

Why are Doctors with Wood FIR Saunas in their homes - buying the Relax Sauna ?

We are often meeting people at conferences who own a \$5000 Wooden Infrared sauna and are reluctant to try the Relax Sauna. However when they actually get into the Relax Sauna and feel the difference, they often are quite amazed and impressed with the efficiency and overall feeling of the Relax Sauna, AND ... how quickly it heats up (30 seconds). We have sold over 50 Saunas in the last year to individuals with wood FIR Saunas in their homes.

The Relax Sauna emits over 95% pure FAR INFRARED RAY ENERGY, whereas the amount of pure Far Infrared Energy that all other Infrared saunas emit is between 35 & 60%. And With the Relax Sauna, you don't need to preheat it. You can feel it "Instantly."

The patented semi-conductor chips , which took 10 years to invent, filter out the space-heater, and non-healing frequencies that do not penetrate the body. Only the penetrating Far Infrared Rays cause the water molecules to pulsate. And that is one of the reasons why the Relax Sauna feels so much better. The silver tent acts as a mirror for the FIR light, and that is why you get an EVEN Distribution of the Healing Light throughout your whole body.

What do Relax Sauna owners like about it ?

In the Relax sauna you can keep your head out. It is also very comfortable to duck your head and enjoy a total body sweat. So you have the choice !

Many love the small foot print (32" x 33") that the Relax Sauna carries. It can go fit anywhere. 3 or 4 saunas can easily fit into a "Special Relax Sauna Room" in your clinic or office !

The portability of the Relax Sauna is also a Big Plus. You can carry it over your shoulder in the carrying bag that comes with it, or it can easily fit in a suit case. A very comfortable chair comes with the Relax Sauna.

The Fact that it takes 30 seconds for you to feel the healing Far Infrared Light in the Relax Sauna, and that you can have a very profuse sweat in only 20 minutes is a GREAT PLUS.

Try the Relax Sauna & Experience the Difference !

2 radiators -1500 watts generate 100%
- FIR light 4-14 microns
